Thin Solid Films 352 (1999) 290–294

thin solid films

Subject Index of Volume 352

Absorption
Properties of a-Si_{1-x} C_x:H thin films deposited from the organosilane Triethylsilane, 249
Acetylacetonate complex
Preferred orientations and microstructure of MgO films prepared by plasma-enhanced metalorganic chemical vapor deposition, 85
Adhesion
Prevention of adhesion failure of a W/TiN/Ti(Co) layer on SiO_2, 128
Microscratch test studies of thin silica films on stainless steel substrates, 156
Enhancement of adhesion and triboluminescence of ZnS:Mn films by annealing technique, 273
Adhesion strength
In situ observation of the cracking behavior of TiN coating on 304 stainless steel subjected to tensile strain, 173
Aluminum oxide
Interfacial reactions in Al_2O_3/Ti, Al_2O_3/Ti_3Al and Al_2O_3/TiAl bilayers, 151
Amorphous silicon–carbon alloys
Properties of a-Si_{1-x} C_x:H thin films deposited from the organosilane Triethylsilane, 249
Atomic force microscopy (AFM)
Investigation of borophosphosilicate glass roughness and planarization with the atomic force microscope technique, 77
Growth and morphology of Te films on Mo, 114
Auger electron spectroscopy
Preferred orientations and microstructure of MgO films prepared by plasma-enhanced metalorganic chemical vapor deposition, 85

Biomaterials
The sensitivity limits of spectroscopic ellipsometry to oxygen content in $YBa_2Cu_3O_{7-\delta}$ thin films, 205
Bulk acoustic wave sensor
Real-time bulk acoustic wave studies of the inhibition behavior of mercaptobenzothiazole on copper, 234

Carbon
Thermal stability of semiconducting thin germanium/carbon alloy films produced from tetraethylgermanium in an RF glow discharge, 6
C_{60} tetracarboxylic acid derivatives
The folding and enzymatic activity of glucose oxidase in the glycolipid matrixes of different charges, 213
a-C:H film
Ellipsometry and Raman study on hydrogenated amorphous carbon (a-C:H) films deposited in a dual ECR-r.f. plasma, 41
Chemical vapor deposition (CVD)
Thin films of tetragonal zirconia with Bi doping: deposition, characterisation and thermal behaviour, 73
Investigation of borophosphosilicate glass roughness and planarization with the atomic force microscope technique, 77
a-SiC_x:H films deposited by plasma-enhanced chemical vapor deposition at low temperature used for moisture and corrosion resistant applications, 97
Chemical vapour deposition of epitaxial WO_3 films, 107
CVD diamond
The effect of nitrogen on low temperature growth of diamond films, 29
Coatings
a-SiC_x:H films deposited by plasma-enhanced chemical vapor deposition at low temperature used for moisture and corrosion resistant applications, 97
Microscratch test studies of thin silica films on stainless steel substrates, 156
Measuring mechanical properties of thin flexible films by a shaft-loaded blister test, 167
Conducting polymers
Infrared switching electroemissive devices based on highly conducting polymers, 243
Conductivity
Observation of Poole–Frenkel effect saturation in SiO_2 and other insulating films, 195
Constitutive equations
Measuring mechanical properties of thin flexible films by a shaft-loaded blister test, 167
Copper
Real-time bulk acoustic wave studies of the inhibition behavior of mercaptobenzothiazole on copper, 234

Deposition process
Early stages of lead dioxide electrodeposition on rough titanium, 49
Depth profiling
Interfacial reactions in Al_2O_3/Ti, Al_2O_3/Ti_3Al and Al_2O_3/TiAl bilayers, 151
Diamond-like carbon films
Influence of sliding mating materials on the tribological behavior of diamond-like carbon films, 145
Dielectrics
Observation of Poole–Frenkel effect saturation in SiO_2 and other insulating films, 195
Diffusion

PII: S0040-6090(99)000519-2

Interfacial reactions in Al_2O_3/Ti, Al_2O_3/Ti_3Al and Al_2O_3/TiAl bilayers, 151
Display
Patterned multiple color polymer light-emitting diodes, 239
Dual electron cyclotron resonance-r.f. plasma
Ellipsometry and Raman study on hydrogenated amorphous carbon (*a*-C:H) films deposited in a dual ECR-r.f. plasma, 41

Electrical properties and measurements
Measuring mechanical properties of thin flexible films by a shaft-loaded blister test, 167
A novel diamine compound containing carbazole groups for organic electroluminescent devices, 185
Electrochemistry
Early stages of lead dioxide electrodeposition on rough titanium, 49
Electrochromism
Fabrication and electrochromic properties of spin-coated TiO_2 thin films from peroxo-polytitanic acid, 62
Infrared switching electroemissive devices based on highly conducting polymers, 243
Electron emission
Growth and morphology of Te films on Mo, 114
Electronic devices
A novel diamine compound containing carbazole groups for organic electroluminescent devices, 185
Ellipsometry
Ellipsometry and Raman study on hydrogenated amorphous carbon (*a*-C:H) films deposited in a dual ECR-r.f. plasma, 41
Epilayer transfer
Transfer of PbSe/PbEuSe epilayers grown by MBE on BaF_2-coated Si(111), 278
Epitaxial growth
Heteroepitaxial growth of PZT thin films on LiF substrate by pulsed laser deposition, 66
Epitaxy
Preparation and characterisation of iron oxide films deposited on MgO(100), 22
Chemical vapour deposition of epitaxial WO_3 films, 107
Epitaxial Growth of Strained Ge Films on GaAs(001), 269

Fluorescence
A novel diamine compound containing carbazole groups for organic electroluminescent devices, 185
Fluoropolymer films
Glow discharge plasma deposited hexafluoropropylene films: surface chemistry and interfacial materials properties, 13
Fourier transform infrared spectroscopy (FTIR)
Interfacial processes during plasma polymer deposition on oxide covered iron, 119
Properties of *a*-Si_{1-x} C_x:H thin films deposited from the organosilane Triethylsilane, 249
Driving force controlling liquid crystal alignment on photochromic polyion complex LB film, 228

Germanium
Thermal stability of semiconducting thin germanium/carbon alloy films produced from tetraethylgermanium in an RF glow discharge, 6
Epitaxial Growth of Strained Ge Films on GaAs(001), 269
Glass
Multilevel structures in sol-gel thin films with a single UV-exposure using a gray-scale mask, 9
Glow discharge
Thermal stability of semiconducting thin germanium/carbon alloy films produced from tetraethylgermanium in an RF glow discharge, 6
Growth mechanism
Growth and morphology of Te films on Mo, 114

Halides
Real-time bulk acoustic wave studies of the inhibition behavior of mercaptobenzothiazole on copper, 234
Hardness
Microscratch test studies of thin silica films on stainless steel substrates, 156

In situ ellipsometry
In situ monitoring of sputtered zinc oxide films for piezoelectric transducers, 179
Infrared
Infrared switching electroemissive devices based on highly conducting polymers, 243
Interfaces
Interfacial processes during plasma polymer deposition on oxide covered iron, 119
Prevention of adhesion failure of a W/TiN/Ti(Co) layer on SiO_2, 128
In situ observation of the cracking behavior of TiN coating on 304 stainless steel subjected to tensile strain, 173
Ion plating
Enhancement of adhesion and triboluminescence of ZnS:Mn films by annealing technique, 273
Iron oxide
Preparation and characterisation of iron oxide films deposited on MgO(100), 22
Interfacial processes during plasma polymer deposition on oxide covered iron, 119

Langmuir–Blodgett film
Electrochemistry of Langmuir–Blodgett and self-assembled monolayers of pyrrole derivatives, 138
The folding and enzymatic activity of glucose oxidase in the glycolipid matrixes of different charges, 213
Study of the photophysical properties of composite film assembled of porphyrin and TiO_2 nanoparticles, 223
Driving force controlling liquid crystal alignment on photochromic polyion complex LB film, 228
Lead telluride
Transfer of PbSe/PbEuSe epilayers grown by MBE on BaF_2-coated Si(111), 278
Lead zirconate titanate (PZT)
Heteroepitaxial growth of PZT thin films on LiF substrate by pulsed laser deposition, 66
Li^+ intercalation
Fabrication and electrochromic properties of spin-coated TiO_2 thin films from peroxo-polytitanic acid, 62
Light-emitting diode

Patterned multiple color polymer light-emitting diodes, 239
Low temperature growth
The effect of nitrogen on low temperature growth of diamond films, 29
Luminescence
A novel diamine compound containing carbazole groups for organic electroluminescent devices, 185
Improved stability of interfaces in organic light emitting diodes with high T_g materials and self-assembled monolayers, 189
Enhancement of adhesion and triboluminescence of ZnS:Mn films by annealing technique, 273

Mechanics of thin film
Measuring mechanical properties of thin flexible films by a shaft-loaded blister test, 167
Mercaptobenzothiazole
Real-time bulk acoustic wave studies of the inhibition behavior of mercaptobenzothiazole on copper, 234
Metallic mode
High-rate reactive deposition of indium oxide films on unheated substrate using ozone gas, 133
Metallization
Prevention of adhesion failure of a W/TiN/Ti(Co) layer on SiO_2, 128
MgO
Preferred orientations and microstructure of MgO films prepared by plasma-enhanced metalorganic chemical vapor deposition, 85
Preparation and characterisation of iron oxide films deposited on MgO(100), 22
Modulated thermoreflectance microscopy
Thermal characterization of thin superconducting films by modulated thermoreflectance microscopy, 91
Molecular beam epitaxy (MBE)
(Ba,Sr)TiO_3 solid solution thin-films grown by a molecular beam epitaxy method, 57
Transfer of PbSe/PbEuSe epilayers grown by MBE on BaF_2-coated Si(111), 278
MBE growth
Transfer of PbSe/PbEuSe epilayers grown by MBE on BaF_2-coated Si(111), 278
Molybdenum
Growth and morphology of Te films on Mo, 114
Monolayers
The sensitivity limits of spectroscopic ellipsometry to oxygen content in $YBa_2Cu_3O_{7-\delta}$ thin films, 205
Monte Carlo simulation
Monte Carlo simulation of mixed multilayer adsorption II: layering transitions and wetting phenomena in non-ideal mixtures, 259
Multicolor
Patterned multiple color polymer light-emitting diodes, 239
Multilayers
The sensitivity limits of spectroscopic ellipsometry to oxygen content in $YBa_2Cu_3O_{7-\delta}$ thin films, 205
Multilayer adsorption
Monte Carlo simulation of mixed multilayer adsorption II: layering transitions and wetting phenomena in non-ideal mixtures, 259
Nanostructures
Study of the photophysical properties of composite film assembled of porphyrin and TiO_2 nanoparticles, 223
Nitrogen
The effect of nitrogen on low temperature growth of diamond films, 29

Optical coatings
Chemical vapour deposition of epitaxial WO_3 films, 107
Optical measurements
Heteroepitaxial growth of PZT thin films on LiF substrate by pulsed laser deposition, 66
Optoelectronic devices
Improved stability of interfaces in organic light emitting diodes with high T_g materials and self-assembled monolayers, 189
Organic substances
Driving force controlling liquid crystal alignment on photochromic polyion complex LB film, 228
Organometallic vapour deposition
Thermal stability of semiconducting thin germanium/carbon alloy films produced from tetraethylgermanium in an RF glow discharge, 6
Oxides
Thin films of tetragonal zirconia with Bi doping: deposition, characterisation and thermal behaviour, 73
Oxygen
The effect of nitrogen on low temperature growth of diamond films, 29
Oxygen content
Photoelectric conversion property of monolayer films of fullerene tetracarboxylic acid derivatives, 218

Patterning
Patterned multiple color polymer light-emitting diodes, 239
PbEuSe
Transfer of PbSe/PbEuSe epilayers grown by MBE on BaF_2-coated Si(111), 278
PbSe
Transfer of PbSe/PbEuSe epilayers grown by MBE on BaF_2-coated Si(111), 278
Photocurrent
The folding and enzymatic activity of glucose oxidase in the glycolipid matrixes of different charges, 213
Photodegradation
Study of the photophysical properties of composite film assembled of porphyrin and TiO_2 nanoparticles, 223
Photoinduced electron-transfer
Effect of aliphatic tails on surface anchoring of amphiphilic ruthenium-polypyridine complexes in water-cast polymer films as studied by photoinduced electron-transfer and optical second harmonic generation, 1
Photoluminescence
Properties of a-Si_{1-x} C_x:H thin films deposited from the organosilane Triethylsilane, 249
Plasma processing and deposition
a-SiC_x:H films deposited by plasma-enhanced chemical vapor deposition at low temperature used for moisture and corrosion resistant applications, 97
Interfacial processes during plasma polymer deposition on oxide covered iron, 119

Plasma-enhanced MOCVD
Preferred orientations and microstructure of MgO films prepared by plasma-enhanced metalorganic chemical vapor deposition, 85
Polycrystalline thin films
Preparation and characterization of oriented thin films of a sulfur–nitrogen radical, 102
Polymers
Electrochemistry of Langmuir–Blodgett and self-assembled monolayers of pyrrole derivatives, 138
Patterned multiple color polymer light-emitting diodes, 239
Pulsed laser deposition
Heteroepitaxial growth of PZT thin films on LiF substrate by pulsed laser deposition, 66

Raman
Ellipsometry and Raman study on hydrogenated amorphous carbon (*a*-C:H) films deposited in a dual ECR-r.f. plasma, 41
Reactive sputtering
High-rate reactive deposition of indium oxide films on unheated substrate using ozone gas, 133
Reflection high energy electron diffraction (RHEED)
$(Ba,Sr)TiO_3$ solid solution thin-films grown by a molecular beam epitaxy method, 57
Reflection spectroscopy
Driving force controlling liquid crystal alignment on photochromic polyion complex LB film, 228
Refractive index
Properties of $a\text{-}Si_{1-x}C_x$:H thin films deposited from the organosilane Triethylsilane, 249
RF-glow discharge
Glow discharge plasma deposited hexafluoropropylene films: surface chemistry and interfacial materials properties, 13
RHEED
Preparation and characterisation of iron oxide films deposited on MgO(100), 22
Rutherford backscattering spectroscopy
Preferred orientations and microstructure of MgO films prepared by plasma-enhanced metalorganic chemical vapor deposition, 85

Scanning electron microscopy
Preferred orientations and microstructure of MgO films prepared by plasma-enhanced metalorganic chemical vapor deposition, 85
Scanning force microscopy
Glow discharge plasma deposited hexafluoropropylene films: surface chemistry and interfacial materials properties, 13
Second harmonic generation
Effect of aliphatic tails on surface anchoring of amphiphilic ruthenium-polypyridine complexes in water-cast polymer films as studied by photoinduced electron-transfer and optical second harmonic generation, 1
Self-assembled monolayers
Electrochemistry of Langmuir–Blodgett and self-assembled monolayers of pyrrole derivatives, 138
Sensors
Enhancement of adhesion and triboluminescence of ZnS:Mn films by annealing technique, 273
Shaft-loaded blister test
Measuring mechanical properties of thin flexible films by a shaft-loaded blister test, 167
Silicon carbide
a-SiC_x:H films deposited by plasma-enhanced chemical vapor deposition at low temperature used for moisture and corrosion resistant applications, 97
Silicon dioxide (SiO_2)
Microscratch test studies of thin silica films on stainless steel substrates, 156
Silicon nitride
Observation of Poole–Frenkel effect saturation in SiO_2 and other insulating films, 195
Silicon oxide
Investigation of borophosphosilicate glass roughness and planarization with the atomic force microscope technique, 77
Observation of Poole–Frenkel effect saturation in SiO_2 and other insulating films, 195
Sol–gel
Fabrication and electrochromic properties of spin-coated TiO_2 thin films from peroxo-polytitanic acid, 62
Multilevel structures in sol-gel thin films with a single UV-exposure using a gray-scale mask, 9
Spectroscopic ellipsometry
Photoelectric conversion property of monolayer films of fullerene tetracarboxylic acid derivatives, 218
Sputtering
In situ monitoring of sputtered zinc oxide films for piezoelectric transducers, 179
Epitaxial Growth of Strained Ge Films on GaAs(001), 269
Surface defects
Investigation of borophosphosilicate glass roughness and planarization with the atomic force microscope technique, 77
Surface migration
$(Ba,Sr)TiO_3$ solid solution thin-films grown by a molecular beam epitaxy method, 57
Surface morphology
Improved stability of interfaces in organic light emitting diodes with high T_g materials and self-assembled monolayers, 189
Surface roughness
Early stages of lead dioxide electrodeposition on rough titanium, 49
Surface structure
Multilevel structures in sol-gel thin films with a single UV-exposure using a gray-scale mask, 9
Electrochemistry of Langmuir–Blodgett and self-assembled monolayers of pyrrole derivatives, 138
The sensitivity limits of spectroscopic ellipsometry to oxygen content in $YBa_2Cu_3O_{7-\delta}$ thin films, 205
Surface structure, morphology, roughness and topography
Preparation and characterization of oriented thin films of a sulfur–nitrogen radical, 102

Tellurium
Growth and morphology of Te films on Mo, 114
Tensile test
In situ observation of the cracking behavior of TiN coating on 304 stainless steel subjected to tensile strain, 173
Thermal anisotropy
Thermal characterization of thin superconducting films by

modulated thermoreflectance microscopy, 91
Thermal boundary resistance
Thermal characterization of thin superconducting films by modulated thermoreflectance microscopy, 91
Thermal diffusivity
Thermal characterization of thin superconducting films by modulated thermoreflectance microscopy, 91
Thin films
$(Ba,Sr)TiO_3$ solid solution thin-films grown by a molecular beam epitaxy method, 57
Heteroepitaxial growth of PZT thin films on LiF substrate by pulsed laser deposition, 66
Measuring mechanical properties of thin flexible films by a shaft-loaded blister test, 167
Thin polymer film
Effect of aliphatic tails on surface anchoring of amphiphilic ruthenium-polypyridine complexes in water-cast polymer films as studied by photoinduced electron-transfer and optical second harmonic generation, 1
Thin YBaCuO films
Thermal characterization of thin superconducting films by modulated thermoreflectance microscopy, 91
TiN coating
In situ observation of the cracking behavior of TiN coating on 304 stainless steel subjected to tensile strain, 173
Titanium
Early stages of lead dioxide electrodeposition on rough titanium, 49
Interfacial reactions in Al_2O_3/Ti, Al_2O_3/Ti_3Al and Al_2O_3/TiAl bilayers, 151
Titanium oxide
Study of the photophysical properties of composite film assembled of porphyrin and TiO_2 nanoparticles, 223
TiO_2 films
Fabrication and electrochromic properties of spin-coated TiO_2 thin films from peroxo-polytitanic acid, 62
Transducers
In situ monitoring of sputtered zinc oxide films for piezoelectric transducers, 179
Transfer films
Influence of sliding mating materials on the tribological behavior of diamond-like carbon films, 145
Tribology
Influence of sliding mating materials on the tribological behavior of diamond-like carbon films, 145
Tungsten
Prevention of adhesion failure of a W/TiN/Ti(Co) layer on SiO_2, 128
Tungsten oxide
Chemical vapour deposition of epitaxial WO_3 films, 107

Wetting
Improved stability of interfaces in organic light emitting diodes with high T_g materials and self-assembled monolayers, 189
Monte Carlo simulation of mixed multilayer adsorption II: layering transitions and wetting phenomena in non-ideal mixtures, 259

X-ray diffraction
Thin films of tetragonal zirconia with Bi doping: deposition, characterisation and thermal behaviour, 73
Epitaxial Growth of Strained Ge Films on GaAs(001), 269
Transfer of PbSe/PbEuSe epilayers grown by MBE on BaF_2-coated Si(111), 278
X-ray photoelectron spectroscopy (XPS)
Thin films of tetragonal zirconia with Bi doping: deposition, characterisation and thermal behaviour, 73
Preparation and characterization of oriented thin films of a sulfur–nitrogen radical, 102
Growth and morphology of Te films on Mo, 114
Transfer of PbSe/PbEuSe epilayers grown by MBE on BaF_2-coated Si(111), 278

$YBa_2Cu_3O_{7-\delta}$
Photoelectric conversion property of monolayer films of fullerene tetracarboxylic acid derivatives, 218

Zinc oxide thin films
In situ monitoring of sputtered zinc oxide films for piezoelectric transducers, 179
